No. 3254

Mitsubishi Electric's Fast Stepwise-learning AI Shortens Motion Learning

Ideal for efficient startup of production equipment

The company announced today that it has developed an artificial intelligence (AI) technology capable of fast stepwise learning using a simulator to efficiently complete motion learning in a relatively short time using the company's Maisart AI technology.

No. 3259

Mitsubishi Electric Develops Multilingual Speech Recognition Technology that Automatically Identifies which Language is Spoken

Will help realize speech interfaces that are highly suited to a wide variety of situations by applying the company's Maisart compact AI to simultaneously identify and understand spoken languages, even when multiple people are speaking

The company announced today that it has developed what the company believes to be the world's first technology capable of highly accurate multilingual speech recognition without being informed which language is being spoken.

About Maisart

Maisart encompasses Mitsubishi Electric's proprietary artificial intelligence (AI) technology, including its compact AI, automated design deep-learning algorithm and extra-efficient smart-learning AI. Maisart is an abbreviation for "Mitsubishi Electric's AI creates the State-of-the-ART in technology." Under the corporate axiom "Original AI technology makes everything smart," the company is leveraging original AI technology and edge computing to make devices smarter and life more secure, intuitive and convenient.

Maisart is a registered trademark of Mitsubishi Electric Corporation.
